## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to shaving and moisturizing compositions comprising sodium hyaluronate, classified in class 514, subclass 25+.
- II. Claims 12-17 and 19-29, drawn to method of shaving, classified in class 424, subclass 73.

Inventions of Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of shaving can be performed with a composition that is materially different from the instant composition as disclosed by Paul et al (US 6555508).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1623

If Group I is elected applicants are further required to elect a single disclosed composition for prosecution.
